PROFESSIONAL SUMMARY

Data Engineer with 5+ years of experience in Data Engineering, Production Support (L2/L3), ETL/ELT development, cloud data platforms, and automation. Proven expertise in designing, optimizing, and supporting enterprise-scale data pipelines across Azure, AWS, and GCP environments. Strong background in Databricks, Snowflake, Spark, Hadoop, Kafka, and workflow orchestration. Skilled in troubleshooting critical production incidents, performance tuning, cloud migrations, and implementing AI-driven automation solutions to improve operational efficiency and platform reliability.

CORE SKILLS

Cloud Platforms: Azure, AWS, GCP
Data Engineering: Databricks, PySpark, Scala, Hadoop, Hive
Data Warehousing: Snowflake, BigQuery, SQL Server, PostgreSQL
ETL/ELT Tools: Azure Data Factory (ADF), SSIS, Informatica, HVR, CData
Orchestration: Apache Airflow, AWS Lambda, AWS Step Functions
Streaming: Apache Kafka, GCP Pub/Sub
Programming: Python, SQL, Shell Scripting, FastAPI, Pytest, JavaScript
DevOps: Docker, Kubernetes, Terraform, Git, SVN, CI/CD
Monitoring: ServiceNow, Jira, Slack, AWS CloudWatch, Azure Monitor
Reporting: SSRS, SSAS

PROFESSIONAL EXPERIENCE

HCL Technologies | Jun 2025 – Present

Brillquest Technologies | Oct 2024 – Jun 2025

Aspino Solutions Pvt. Ltd. | Jul 2024 – Sep 2024

Brillquest Technologies | Aug 2020 – Jun 2024

KEY PROJECTS

Citi Bank & National Australia Bank (NAB) – AIDA Platform

Data Engineer | L2/L3 Production Support

- Managed 24x7 production support for enterprise data pipelines ensuring SLA compliance.
- Resolved Databricks, Spark, Snowflake, BigQuery, and Hive platform issues.
- Led Databricks migration initiatives and optimized Spark cluster performance.
- Automated operational workflows using Python, FastAPI, and Shell scripting.
- Developed containerized deployment solutions using Docker and Kubernetes.
- Built Generative AI prototypes for automated alert classification and incident handling.

American Express – Data Modernization Program

Data Engineer

- Developed scalable PySpark pipelines ingesting data from ADLS to Snowflake.
- Orchestrated enterprise workflows using Azure Data Factory.
- Optimized ETL processes and SQL workloads, reducing execution time and cloud costs.
- Implemented data governance, security controls, and incremental loading frameworks.

CVS Health – Healthcare Data Platform Support

ETL Support Engineer

- Supported healthcare claims and eligibility data processing systems.
- Managed SSIS ETL pipelines, SSRS reporting, and SSAS analytical solutions.
- Performed performance tuning for Snowflake, ADF, and SQL-based workloads.
- Implemented proactive monitoring and alerting mechanisms.

State Street – ARCHER Migration Program

ETL Support Engineer

- Migrated legacy ETL workloads to Snowflake-based architecture.
 - Developed cloud-native ingestion solutions using AWS Glue, Lambda, and S3.
 - Managed workflow orchestration through Apache Airflow.
 - Optimized complex SQL transformations across PostgreSQL and SQL Server.
-
